PROFESSIONAL SUMMARY

Delivery-focused Microsoft Certified Trainer, AI / Automation and Power Platform Specialist with experience building and supporting structured, low-code solutions that improve how organizations manage data and processes. Strong at translating business needs into practical system builds, including SharePoint lists, workflows, and integrations with platforms such as Salesforce. Experienced in working with stakeholders to understand requirements, clean and structure data, and support the delivery of reliable, scalable solutions across enterprise environments. Known for a methodical approach, clear communication, and a focus on building systems that are usable, well-governed, and aligned to real operational needs.

CORE SKILLS AND COMPETENCIES

- Business Process Automation
 - Microsoft Power Platforms Development (Power Apps, Power Automate, SharePoint)
 - Azure Integration & Cloud Services
 - AI & Process Automation
 - Application Development and Automation
 - Agile & DevOps Methodologies
 - Stakeholder Engagement and Communications
-

PROFESSIONAL EXPERIENCE

Associate SharePoint Build | TORI Global | 02/2026 – Present

- Built and supported centralized SharePoint databases to consolidate fragmented and operational data across client environments.
- Designed SharePoint data structures, permissions, and metadata to improve data quality and access control.
- Cleansed, validated, and migrated data from multiple legacy sources into structured SharePoint solutions.
- Supported the integration and synchronization of SharePoint data with Salesforce, ensuring consistency between operational and CRM systems.
- Assisted with user acceptance testing, issue resolution, and go-live support to ensure stable and reliable delivery.
- Produced clear documentation and handover materials to support ongoing system use and maintenance.

Applications and Development Consult | University of Hertfordshire | 01/2025 – 01/2026

- Designed and deployed custom business applications using Power Apps and Power Automate to streamline internal processes.
- Integrated Power Platform solutions with Azure services and third-party APIs to enhance functionality.
- Provided technical advisory on application architecture, scalability, and security.
- Automated workflows and reporting processes, improving operational efficiency and reducing manual effort.
- Supported user adoption through documentation, training, and ongoing support.

Professional Development | Career Break | 12/2022 – 10/2024

- Completed MSc in Data Science with Distinction.
- Earned Microsoft Power Apps & Azure AI Engineer certifications.
- Participated in Microsoft Power Platform training and hands-on labs.
- Engaged in peer mentoring and community learning initiatives.

Data Governance Consult | Pinnacle | 01/2022 – 12/2022

- Led data quality and governance initiatives across business units.
- Advised stakeholders on data management best practices and compliance.
- Delivered training sessions and awareness campaigns on data literacy.
- Supported adoption of metadata management tools and frameworks.

System Analyst | Ministry of Communications | 12/2014 – 12/2021

- Analyzed data to support decision-making and produced reports that provided insights into operational efficiency.
- Designed and implemented 8+ government software systems.
- Led training programs for 500+ staff on new digital tools and systems.
- Managed cross-agency stakeholder relationships to ensure successful IT rollouts.
- Oversaw 15+ technology projects from planning to delivery.
